Alec (Bunk) Wurth sustained a serious spinal cord injury while playing rugby on February 25, 2006. This catastrophic injury immediately claimed his ability to move from the base of his neck down, as well as his ability to breathe on his own. He remains steadfast in his goals of being alive, staying healthy and actively involved in life, and seeking and adhering to a new and positively hopeful way of life. Family, friends and especially Bunk are confident that through his hard work and determination, faith, modern medicine, and prayers, Bunk will have the opportunity to push the envelope of his rehabilitation and enjoy some of its benefits. We welcome your friendship, prayers, and of course your encouragement!

Come enjoy some pizza and beer while helping Bunk on his road to recovery!
